

Introducing **EZOCEAN**

Are you frustrated on below situations when you try to find right carrier and right service for your cargo?

- Difficult to get a complete picture on all available services in the market;
- Difficult to know which carriers are providing direct service on the portpair you are looking for;
- Difficult to check alternative routing or nearby optional ports;
- Time consuming to check each carrier's website. Plus, it is difficult to combine all carriers' information in a standard way.
- Most third party platform are providing detailed vessel schedule information. Data volume is too much to summarize. Some data is fee-based or need registration.
- When each carrier is using its own service code, it is difficult to tell whether it is shared service or not.

Why do we need **EZOCEAN**

Are you frustrated when you try to find a suitable vessel schedule for your ready-to-ship cargo?

- Difficult to compare vessel schedule by origin port departure day, destination port arrival day, transit time, vessel operator, vessel capacity, and etc.
- Terminal information is not complete or is not easy to find.
- Difficult to find other customers' feedback on carrier and their services.

In sum, information on carrier service and schedule is scattered and it is difficult to gather and compare. **To provide you a one-stop information searching experience, we are presenting EZocean.com.**

ANALYSIS & REPORT

ENGLISH

Three functions:

- **Service Search**: Check all available services in the market, compare their strength and weakness, fully evaluate carrier and its service by referring to other users' comments.
- **Schedule Search**: Check suitable vessel schedule by comparing their departure day, destination arrival day, transit time, terminal, vessel operator, vessel capacity, and etc.
- **Comments**: Refer to other users' feedback or write your own comments.

How to browse EZOCEAN

- Current data covers four trades. You can click on four yellow bars to check services in each trade.
- Main page has a popular port to port search bar. You can switch between searching by service and by schedule.
- Port name input could be key words in the name or code. System will quickly provide choices to select.
- Recently searched six records will be kept on the screen for future repeated use.

[Search by Port](#)

Four methods to search service

- **Port to Port Search:** Input origin port and destination port to get result; carrier's code on the same service is combined.
- **Search by Carrier:** Input origin port and destination port to get result; carrier is listed in separate line even for the same service.
- **Search by Trade:** No need to input port; just click on specific trade to see all services. Sub-trade item will be shown.
- **Search by Port:** Input origin port or destination port to see all services calling this port. Easy to compare service by day or by terminal.

How to browse EZOCEAN

“Service” page

- **Search by Carrier** is almost the same as Search by Port to Port;
- The only difference is to show carrier one by one even they share the same service. Service code is no longer combined together.
- This search is suitable for user with certain carriers in mind.

ID	Carrier	Service Code	Origin Port Departure Day	Destination Port Arrival Day	Consortium	Operators (vessel amount)	Capacity	TRANSMIT DAY	Port Rotation	Comments

How to browse EZOCEAN

“Comment” page

- Click “Comments” menu to select a carrier and then check comments for all services under this carrier.
- Read and Write comments.

The screenshot shows the EZOCEAN website interface. On the left is a navigation menu with a dropdown for 'HPL' and several service categories: MED, MED EAST (with a sub-item 'GEM' marked with a '2'), MD3 (marked with a '2'), MED WEST, NEU, TPE, TPW, PNW, and PSW. The main content area has a blue header 'Hapag Lloyd >>GEM'. Below the header, there are two comment entries. The first entry is for 'HPL>>GEM' with the text '波斯湾/红海到地东的专属航线。由HPL/CMA/COSCO 投船。 Dedicated service from Arabian Gulf /Red Sea to Mediterranean East. HPL/CMA/COSCO vessels.' and is attributed to '一只羊 EZOcean.com' from '24 days ago...'. The second entry is also for 'HPL>>GEM' with the text '到土耳其的主力航线；全面覆盖红海和波斯湾港口。印度半岛通过吉达中转到地东。 Prime product from several Turkish ports;Full coverage of entire Red Sea scope with outpost links to Aqaba, Port Sudan, Sokhna and Yemen ports;Dedicated calls in Hamad, Jubail and Dammam;Connecting the Indian Subcontinent with East Mediterranean ports via Jeddah;' and is attributed to '船公司网站 From Carrier website' from '24 days ago...'. At the bottom, there is a 'ADD COMMENT' section with a note 'Email address will not be published. Required fields are marked as *'. It includes input fields for 'Name*' (containing 'Please enter Userid') and 'E-mail*', and a large text area for the 'Message'. A yellow 'POST COMMENT' button is located at the bottom right of the message area.

EZOCEAN Product & Service

- EZocean team belongs to Kline Changsha Data Processing Co. Ltd., a subsidiary company of Kline China Co. Ltd. We have been serving ocean carrier's data outsourcing for many years.
- We know the logic how to make long term schedule, and we use database to generate schedule after processing carriers' service information. We do manual checking to catch up updates on long term schedule.
- We use consortium concept when we organize and compare each carrier's data.
- ezocean.com data layout and searching method is very user friendly.
- ezocean.com is free. No registration is needed.
- In the future we will add inland routing guidance and terminal information.
- We can provide API service to connect your system to provide service and schedule information to help with real time pricing and space management.
